Missoula County Public Works Department Announces 2018 Dust Abatement Program

The Missoula County Public Works Department invites the public to participate in its 2018 dust abatement program. This share program has grown significantly since its inception in 2007 and the County works to supplement its own program with resident participation where ever possible. To achieve that goal, Missoula County allows residents to purchase dust palliative by adding their quantities to the County's annual purchase that is advertised for bids. Residents are only responsible for the palliative material costs attributable to their individual application. There is no separate charge for application or for the preparation that is completed by the County.

To be included in the share program, residents must submit a commitment letter to the Public Works Department by March 30 and have paid for the material by May 18. Application of the palliative is tentatively scheduled to start on June 11 and should take two weeks to complete, depending on weather and contractor availability.

All relevant information about the dust abatement program and associated forms for the share program may be found by visiting the Public Works Department website at www.missoulacounty.us/dustabatement, by calling Kris Blank at 258-3710 or by visiting the Public Works Department located at 6089 Training Drive (at mile marker 2 on West Broadway, west of the Missoula International Airport).

###

The mission of the Missoula County Department of Public Works is to serve the residents of the County in the areas of engineering and surveying services, road and bridge construction and maintenance, water and wastewater facilities construction and maintenance, mapping, and Rural Special Improvement District (RSID) creation.
