

Mowing

The County performs annual roadside mowing for safety and maintenance concerns. On rural roads, we all know that animals and even people can come out onto the road at any time. Keeping the roadside vegetation mowed gives drivers more time to avoid the possibility of an accident.

For maintenance purposes, we mow in order to address surface water drainage. When vegetation is left unchecked, it becomes heavily rooted and matted and traps moisture on the edge of the road where subgrade materials become saturated and will eventually lead to travel surface failures.
