

*Missoula County Safety  
Committee  
Certificate of Appreciation  
Awarded to  
Facilities Management*

The Missoula County Safety Committee presents this Certificate in special recognition to Facilities Maintenance for their participation in the coordination and installation of MCCHD and PHC's security and lockdown systems. They restored our inverter system that was destroyed by a power surge resulting in the county's loss of power to many vital departments including the 911 call center. Facilities Management staff have been working diligently to get the fairgrounds up to par not only for public enjoyment but also for the safety of the public and our employees. They've spent a considerable amount of time looking after all of new construction projects county wide. And the list goes on and on...!
