Subject: Dust Abatement 2020!
Attachments: 2020 Dust Abatement_Web Posting.pdf; 2020 Dust Abatement Commitment Letter.pdf

Happy Friday!

We are finally getting some snow (in the Missoula area – I know there has been more in the outlying areas) and now we're talking DUST ABATEMENT already!

I have attached a list of all of the roads Missoula County will be abating this year, as well as the lengths of each. If your road or section of road is not on this list, it's a county maintained road, and you wish to have dust abatement done, please fill out the attached commitment letter and return it to me by March 6th. Again, please know that by signing and returning this form, it does not 'commit' you. This form simply gives us an idea of the total number of feet that will be done. This number then helps companies that wish to bid to do our dust abatement, a basic guideline for how much product will be needed, therefore a price per foot. Once I know the winning bid, I will send another email with price per linear foot. At that point, you may opt to not have dust abatement done. Simply email me and let me know you'd like to be removed from our list for this year. (Your email address will be retained for notifications unless otherwise requested to be removed.)

All information, including both attachments and this email, are on our website www.missoulacounty.us/dustabatement.

Please do not hesitate to reach out if you have any questions! Until then, have a safe and happy last couple of months of winter!
